

NEW! Veichi 4G Connectivity Module.

Why connect your Veichi?

Our new Veichi 4G cards give you a big step up from the old 2G:

- Works in Vodacom / MTN signal zones
- CEDAR sells a 12-month data sim package - no need to buy airtime every month
- Turn your pump **on or off** remotely
- See all **errors and notifications** so you can manage your pump better
- **Remote programming** - if a setting needs changing, Cedar can help you sort it out remotely
- Connects straight to the SI23 or SI30 Veichi models
- For locations near a router, we offer an alternative Wi-Fi module - please note the 4G does not support Wi-Fi.

Smarter, more connected pump control - get in touch to upgrade. ☀
